

SCHEMATIC SYNTHESIS OF THE FLUXNET LICENSES

This is a schematic synthesis of the main characteristics of the FLUXNET licenses, that apply only to the products generated with the ONEFlux code and distributed under the CC-BY-4.0 license (with an exception of the Tier2 of FLUXNET2015).

FLUXNET products have been released in different collections and through different channels and this what is making the license requirements heterogeneous. With the new FLUXNET distribution system all will be simplified.

PLEASE NOTE that the complete license, with all the details, are reported in the specific network websites that is what the users must check and follow:

- AmeriFlux (AMF): <https://ameriflux.lbl.gov/data/data-policy/>
- ICOS: <https://www.icos-cp.eu/how-to-cite>
- TERN: <https://www.tern.org.au/terms-of-use/>

In all cases, there is a standard FLUXNET acknowledgment that should be added whenever requested (and in general welcome):

“FLUXNET data products were produced and harmonized by eddy covariance regional networks and data processing centers, including AmeriFlux, ChinaFlux, European Fluxes Database, ICOS, JapanFlux, KoFlux, OzFlux, SAEON, and TERN. These products also include a modified version of ERA5 hourly data provided by the Copernicus Climate Change Service.”

DATASET

How to verify

License requirements

**FLUXNET2015
Tier1**

Data until 2014 maximum, **WITHOUT** sites RU-Sam, RU-SkP, RU-Tks, RU-Vrk, SE-St1 and ZA-Kru.
List:
<https://fluxnet.org/data/data-availability/>

- 1) Cite the paper “Pastorello et al. 2020 – doi: 10.1038/s41597-020-0534-3”;
- 2) List each site used by its FLUXNET ID and/or per-site DOIs in the paper (these DOIs are provided with download)

**FLUXNET2015
Tier2**

Data until 2014 maximum, **INCLUDING at least one of the sites** RU-Sam, RU-SkP, RU-Tks, RU-Vrk, SE-St1 and ZA-Kru
List:
<https://fluxnet.org/data/data-availability/>

- 1) Contact ALL the data provider (all the sites) to offer possibility to contribute;
- 2) Cite the paper “Pastorello et al. 2020 – doi: 10.1038/s41597-020-0534-3”;
- 3) List each site used by its FLUXNET ID and/or per-site DOIs in the paper (these DOIs are provided with download)

DATASET

How to verify

License requirements

ICOS Drought2018

Data until 2018 maximum, only European sites
List:
https://meta.icos-cp.eu/collections/ueb_7FcyEcbG6y9-UGo5HUqV

- 1) Cite: "Drought 2018 Team, ICOS Ecosystem Thematic Centre, 2020. Drought-2018 ecosystem eddy covariance flux product for 52 stations in FLUXNET-Archive format" <https://doi.org/10.18160/YVR0-4898>;
- 2) List each site used by its FLUXNET ID

ICOS Warm Winter 2020

Data until 2020 maximum, only European sites
List:
<https://meta.icos-cp.eu/collections/gdINRHdRH6xknqoLsIU1FOZ4>

- 1) Cite: "Warm Winter 2020 Team, ICOS Ecosystem Thematic Centre, 2022. Warm Winter 2020 ecosystem eddy covariance flux product for 73 stations in FLUXNET-Archive format—release 2022-1. <https://doi.org/10.18160/2G60-ZHAK>;
- 2) List each site used by its FLUXNET ID

ICOS Level2 Releases

Data updated regularly (at least once per year), only European ICOS sites
List (changing yearly):
<https://meta.icos-cp.eu/collections/m09wyRXYTpZJBpuefjJesxmG>

- 1) Cite: the citation lists a large number of authors and then something like (changing each release) "... Ecosystem final quality (L2) product in ETC-Archive format - INTERIM release 2025-2. <https://doi.org/10.18160/R3G6-Z8ZH>;
- 2) List each site used by its FLUXNET ID

ICOS all other data

Data continuously updated, sites from Europe but also from other areas of the globe.
List:
<https://data.icos-cp.eu/portal/#%7B%22filterCategories%22%3A%7B%22type%22%3A%5B%22miscFluxnetArchiveProduct%22%5D%7D%7D>

- 1) Citation of the PID for each single site used must be in the paper, with the table of sites;
- 2) In the Data Citation section report the date when the ICOS CP has been accessed
- 3) FLUXNET Acknowledgment

AMERIFLUX CC-BY4 sites

Data continuously updated, sites from all Americas.
List:
https://ameriflux.lbl.gov/sites/site-search/?availability#data_product=fluxnet

- 1) Citation of the DOI for each single site used must be in the paper, with the table of sites;
- 2) Acknowledgment: "Funding for the AmeriFlux data service was provided by the U.S. Department of Energy Office of Science" + FLUXNET Acknowledgment

TERN

Data continuously updated, sites from Oceania
List:
<https://portal.tern.org.au/results?search=%5B%7B%22boolean%22%3A%22AND%22%2C%22text%22%3A%22fluxnet%2Brelease%22%7D%5D>

- 1) Citation of the DOI for each single site used must be in the paper, with the table of sites;
- 2) Acknowledgment: "Data was sourced from Terrestrial Ecosystem Research Network (TERN) infrastructure, which is enabled by the Australian Government's National Collaborative Research Infrastructure Strategy (NCRIS)." + FLUXNET Acknowledgment

NEW FLUXNET

Data collected from the ICOS, AmeriFlux and TERN repositories (continuously updated), the three networks' policies apply
List: data.fluxnet.org

- 1) Citation of all the DOI/PID provided, one per site
- 2) List each site used by its FLUXNET ID
- 3) FLUXNET acknowledgment
